

How to create a Voltage Divider with Gschem and Ngspice

Dylan Ortiz

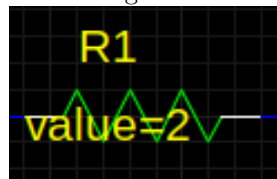

March 29, 2020

1 Get components

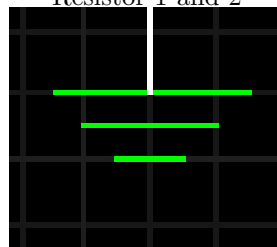

Recognize the elements that will be required in order to build the voltage divider with the software Gschem.

Voltage source

Resistor 1 and 2

Ground

2 Build voltage divider circuit

After finding the elements needed for the circuit, we proceed to build the voltage divider, this means two resistors will be in series with a voltage source.
